Follow Up Document

Please fill out the following questions as well as you can. When "detail" is mentioned please use at least 3 sentences to describe what you're trying to say.

What went wrong?
List at least 3 different things in detail that went wrong for you during the assignment.

I had the problem where I could not connect through SSH to the virtual host and also that apt installed version 2.1 of Ansible instead of 2.2.

What was most difficult about learning Ansible?
List at least 3 different things in detail that went wrong with Ansible during the assignment.
The syntax and the arguments for the modules were strange at first until after a couple of visits to Ansible module page.

What was most difficult about learning Vagrant?
Except for the SSH issue I had no problems with Vagrant since I only ever used the up, destroy and ssh commands.

What did you learn from this assignment?
Why it is a good idea to spend some time learning programs like Ansible and Vagrant. Some effort could save a lot of effort later on if something goes wrong.
Ansible syntax and learning what the modules do.

What is something non-technical that you learned from this assignment?
I can not come up with anything non-technical.

What would you have liked to learn from this assignment but didn't?
Do one or two task entirely on our own.

Do you still have any questions regarding what was covered by the assignment?
List any questions here.
